# Nube iO Website Content (Demo)

Section 1: Modern Building Automation

Below is the image and the copy-paste ready text for rewording.

Text:
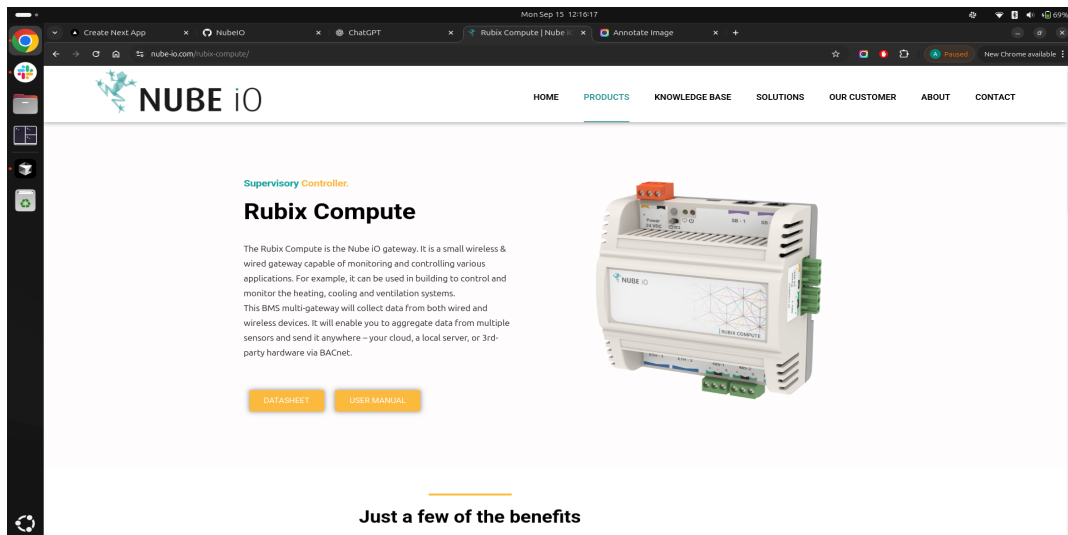

Modern Building Automation

Nube iO is a complete end to end building automation solution with no software licensing.

A powerful, cost effective BMS solution for small to medium sized buildings packed with IoT capabilities.

Reduce installation cost and enhance integration to existing BMS or 3rd party devices with LoRa Wireless networking and multiprotocol Edge Gateway.

Section 2: Rubix Compute

Below is the image and the copy-paste ready text for rewording.

Text:

Rubix Compute

The Rubix Compute is the Nube iO gateway. It is a small wireless & wired gateway capable of monitoring and controlling various applications. For example, it can be used in building to control and monitor the heating, cooling and ventilation systems. This BMS multi-gateway will collect data from both wired and wireless devices. It will enable you to aggregate data from multiple sensors and send it anywhere – your cloud, a local server, or 3rd-party hardware via BACnet.
